(O)

180° fuel filter repair line for Cavalier and Sunbird

(R)

R - includes installation hardware

FUEL SENDING UNIT REPAIR LINES

- repair rusted and leaking sending unit/fuel pump steel lines
- all repair lines are original equipment style with 90 degree bend
- 90 degree end has been reduced in diameter and is easily soldered or cold welded (JB Weld) into base of old line
- replacement lines are easy to install at a fraction of the cost of new fuel sending unit
- no special tools are required to install new lines, simply cut off old rusted line flush with top plate of sending unit and solder or cold weld (JB Weld) new repair line in
- reduces the cost for the customer and makes extra profit for the installer
